

get to know arcules

Arcules is a Canon Company that delivers the next generation of cloud-based video surveillance, access control and video analytics – all in one unified, intuitive platform. We help organizations eliminate complexity, reduce maintenance, and save costs while improving safety and optimizing business operations.

arcules solutions

Pure Cloud for Ultimate Security

VIDEO DATA AND ANALYTICS IN THE CLOUD

Continuously record and protect video data in the Arcules Cloud. Cloud analytics deliver additional security and business intelligence for your business.

- Flexible and scalable Cloud storage options
- Redundant data protection in Google Data Centers
- Stream video on demand for low-latency live view and playback

Edge Cloud for Low Bandwidth

VIDEO DATA ON THE EDGE

The low-bandwidth solution uses local storage to eliminate bandwidth bottlenecks, delivering the benefits of cloud with video storage at the edge.

- Setup, manage, operate and view video through the Arcules Cloud
- Store video locally at the edge
- Only uses 10-50 Kbps bandwidth while recording video
- Archive and protect video evidence to the Cloud with Case Management

Camera to Cloud for Serverless Deployment

CONTROLLED BANDWIDTH WITH ON-CAMERA AI

Eliminate the need for a gateway appliance and connect directly from the camera to the Arcules cloud.

- Remove the need for onsite server hardware and reduce your IT support costs
- Lower network bandwidth by leveraging computing on the camera itself
- Gain valuable detection and decision intelligence using on-camera deep learning capabilities

mix-and-match architectures

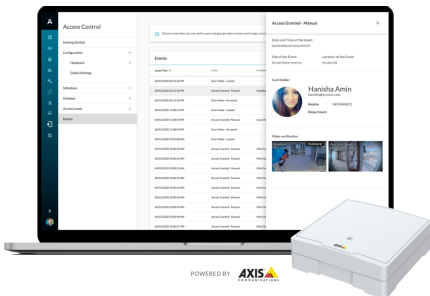

Arcules customers can choose the architecture that works best for their business. Choose a pure cloud option for your main facility, camera to cloud for satellite offices, or seamlessly mix and match solutions at the same location. This flexibility accommodates various budget and bandwidth considerations.

access control as a service

POWERED BY AXIS COMMUNICATIONS

The Arcules Access Control as a Service (ACaaS) Solution offers growing enterprises commercial access control that provides easy remote management, increased security, and minimal maintenance.

- Correlate access control events, like badge scans with recorded video footage.
- Arcules enables faster setup than traditional security systems. Quickly and easily configure users, access levels, schedules and holidays.
- Integrated access control with video surveillance in one interface, for a complete security experience.
- Integrates with Axis A1601 and A1001 Controllers.

the arcules story

open platform technology partner integrations

Unlike other cloud video providers that require you to rip & replace cameras, Arcules simply integrates with existing cameras and network infrastructure, which means little to no hardware changes, and ultimately savings. For a complete list of compatible cameras visit arcules.com/devices
